Continuing Enrollment Policy

When a student does not graduate from the Mennonite College of Nursing graduate program on schedule according to the Plan of Study creating lapses in clinical practice the student must register for ongoing clinical practicum until the graduate degree is awarded. The practicum should consist of care consistent with the sequence and consist of a minimum of 120 clinical hours per academic session. This practicum will be handled as an Independent Study with the Director of the Graduate Program. A contract specifying the clinical sites, nature of supervision, number of clinical hours and scheduling is developed between the Director and the student and signed by both parties.
