

Mennonite College of Nursing BSN Program Outcomes

Students graduating from the undergraduate BSN program will be:

- A provider of compassionate person-centered care who demonstrates a commitment to diversity, caring, and advocacy in promoting improved health capacities for individuals, families, communities, and populations across a continuum of care settings.
- A steward of resources who adapts to human, financial, material, and regulatory realities to coordinate innovative, effective, quality, safe care.
- A therapeutic communicator who effectively and ethically manages health information and evolving communication technologies to improve care coordination in meeting care outcomes.
- A collaborator who coordinates care activities among interprofessional members of the healthcare team to impact health outcomes of individuals, families, communities, and populations across a continuum of care settings.
- A life-long learner who uses theory, assessment, evidence, leadership skills and practice experience to apply sound clinical judgement to address health needs of individuals, families, communities, and populations across a continuum of care settings.
- A nurse generalist who integrates knowledge and skills from a baccalaureate education in applying evidence-based solutions to health issues to promote wellness for individuals, families, communities, and populations.
- An advocate for the improvement of social determinants of health through advancing evidence-based health policy and population-based interventions.
- A self-reflective, self-aware, empathetic nurse who incorporates cultural and spiritual care, systemic equity, and inclusion throughout the client's plan of care based on mutual goals.
- A nurse who demonstrates interpersonal, personal, mental, emotional, self-regulatory, and health practices that allow them to adapt, respond, and flourish within a changing healthcare environment.
