Class Attendance

Students are expected to be present at all scheduled discussions and class sessions. Frequent or prolonged absences from scheduled classes and/or corequisite clinical course experiences may necessitate that the student drop the practicum sequence courses. All matters pertaining to student health and illness are to be referred to the course instructor or to the Director of the Graduate Program, if appropriate. A student wishing to drop a practicum sequence course must discuss the matter with the instructor, the academic advisor, or the Director of the Graduate Program.
