Course Sequencing

Five of the courses in the family nurse practitioner sequence are considered “clinical” courses. These are NUR 431, 471, 473, 475, and 477. These courses are to be taken in this sequential order and in consecutive academic terms. Thus, the student will take 431 in fall semester, 471 in spring semester, 473 in summer session, 475 in fall semester, and 477 in spring semester. Family Nurse Practitioner IV 477 is the synthesis course in which the student applies what has been learned in all of the other clinical courses.
